CARRIER PROFILE**

PBTL TRANSPORT INC

NSC# 0185666

Customer# 88428206

June 30, 2023

Rating: SATISFACTORY AUDITED

Carrier Profile Information

A motor carriers' performance ratings are based on the carriers' one year record of at-fault accidents, convictions, and on-road Commercial Vehicle Safety Alliance (CVSA) inspections. Points are assigned as follows:

At Fault Accidents: 2 points – Property Damage
 4 points – Injury
 6 points – Fatality

Convictions: Points ranging from 1 to 5 points are assigned to a conviction depending on the severity of the offence, 5 points to the most serious offence.

CVSA Inspections: 3 points per Inspection Report with one or more Out of Service (OOS) items. .25 points per Inspection Report with one or more Defect items only. Credit is given for total number of inspections.

Each carrier's performance is assessed on each of the three measures listed above. For each measure, threshold levels have been determined based on a maximum value considered safe. When a carrier's performance on convictions, at-fault accidents, OR inspections exceeds a threshold, remedial action will be triggered. As the carrier's performance approaches the maximum safe value, the remedial actions will become progressively more severe, as described below.

0 - 39%	acceptable performance
40 - 64%	1st warning letter advising carrier they are over the recommended safety
65 - 84%	2nd warning letter, normally followed up with a phone call to the carrier to discuss safety levels and profile performance
85% and up	facility audit conducted

Legend for the Carrier Profile – Inspections

Commercial Vehicle Safety Alliance (CVSA) Inspection Levels

Level I - North American Standard Inspection(NAS) - An inspection that includes examination of driver's license, medical examiner's certificate and waiver, if applicable; alcohol and drugs, driver's record of duty status as required, hours of service, seat belt, vehicle inspection report, brake system, coupling devices, exhaust system, frame, fuel system, turn signals, brake lamps, tail lamps, head lamps, lamps on projecting loads, safe loading, steering mechanism, suspension, tires, van and open-top trailer bodies, wheels and rims, windshield wipers, emergency exits for buses, hazardous materials (HM) requirements, as applicable. HM required inspection items will be inspected by certified HM inspectors.

Level II - Walk-Around Driver/Vehicle Inspection - An examination that includes each of the items specified under the North American Standard Inspection. As a minimum, Level II inspections must include examination of driver's license, medical examiner's certificate and waiver, if applicable; alcohol and drugs, driver's record of duty status as required, hours of service, seat belt, vehicle inspection report, brake system, coupling devices, exhaust system, frame, fuel system, turn signals, brake lamps, tail lamps, head lamps, lamps on projecting loads, safe loading, steering mechanism, suspensions, tires, van and open-top trailer bodies, wheels and rims, windshield wipers, emergency exits on buses, and HM requirements as applicable. HM required inspection items will be inspected by certified HM inspectors. It is contemplated that the walk-around driver/vehicle inspection will include only those items that can be inspected without physically getting under the vehicle.

Level III - Driver-Only Inspection - A roadside examination of the driver's license, medical certificate and waiver, if applicable; driver's record of duty status as required, hours of service, seat belt, vehicle inspection report and HM requirements as applicable. HM required inspection items will be inspected by certified HM inspectors.

Level IV - Special Inspections - Inspections under this heading typically include a one-time examination of a particular item. These examinations are normally made in support of a study or to verify or refute a suspected trend.

Level V - Vehicle-Only Inspection - An inspection that includes each of the vehicle inspection items specified under the North American Standard Inspection (Level I), without a driver present, conducted at any location.

Level VI - Enhanced NAS Inspection for Radioactive Shipments - An inspection for select radiological shipments, which includes inspection procedures, enhancements to the Level I inspection, radiological requirements, and the enhanced out-of-service criteria. Select radiological shipments include only highway route controlled quantities as defined by US Title 49 CFR(Code of Federal Regulations) section 173.403 and all transuranics.

OOS = Out of Service
